### ONEONTA SALES CO.

## **About Retailers-the Growing Mass** and the Dwindling Class

Goods which are well advertised nationally by the manufacturer are largely sold to the public before they ever reach the retailer.

Goods which are not advertised by the producer must be sold by the retailer.

In the one case, the manufacturer has done a great part of the job; in the other he has left it all for the dealer to do.

For many articles, national advertising creates an actual demand, so that all the dealer need do is to say "You can buy it here." In other lines, the advertising identifies the product in the possible buyer's mind, arouses his interest in it and establishes his confidence in the maker, upon which the dealer can cash in by his own selling

But with unadvertised goods, the retailer must start from scratch.

Retailers who favor nationally advertised lines believe in selling what the public wants. They are a growing mass.

Retailers who favor unadvertised lines believe in selling what they want the public to buy. They are a dwindling class.

The ranks of these latter retailers are rapidly growing smaller because most of them are learning that public confidence is the basis of successful selling; that quick turnover is a shorter and surer road to profit than long discounts on slow-moving, dust-gathering goods: that even those customers who appear to swallow their selling talk on unadvertised merchandise have a discouraging way of not coming back for mo

Just the other day a paint and varnish dealer in California wrote to a manufacturer in the Middle West whose name is known through national advertising wherever varnish is used. "We are discontinuing our other lines and hereafter will center our efforts upon (mentioning the name of the maker's product) because the demand is

About the same time a printer in a Northern Ohio city was telling his paper jobber that thereafter he intended to standardize on a certain nationally advertised make of bond paper because "everybody knows it, and it is so easy to sell."

And a druggist who carries packaged chocolates stated that he stocked only the nationally known makes, with the exception of one make well known locally, because all he bad to do was hand out what the customer asked for and take the money.

Ten years ago—yes, even five the manufacturer's salesman who went around to the trade and talked about his firm's national advertising was likely to be met with the statement that it would be a lot better if his concern took the money it was putting into advertising and used it to enlarge discounts to the

Today, the fact that he is a real national advertiser is a tremendous asset with the trade to any manufacturer, and his salesman's portfolio of advertising is as important as-very frequently more important than his sample case.

Several up-state papers published | od unsafe, especially during the first where summary action has ally accepted that one engineer not in a day's time, returned home and

caused some comment here, although to men usually well informed rela-

tively to railroad matters. The dispatch, after reciting the cir rumstances causing the trouble and stating that Mr. Loree had refused

to reinstate the men, says: Within an hour after the conference with President Lorge representatires of the two brotherhoods conferred with other officials of their organizations, after which it was decided to place the matter before the brotherhood chiefs in Cleveland.

Although the brotherhood heads have not taken any action in the mat-ier, it was pointed out plainly today by representatives of the D. & H. in this city that they would not be surprised if a strike was declared on the D. & H. within 72 hours.

In view of the fact that Warren E. Stone, head of the Brotherhood of Engineers, has issued a statement that no engineer had to take out a locomotive that was in a dangerous condition, the belief was general here today that unless Mr. Loree reinstates the discharged engineer and fireman a strike will take place.

On Monday, it is expected the broth erhood chiefs in Cleveland will inform the leading representatives of the brotherhoods on the D. & H. to take a strike ballot that may be acted upon the following day.

In 1922 the Chevrolet led the world in sales of high grade closed cars, chiefly because of the Sedan. The new 1923 Sedan is completely eclipsing its predecessors because of still greater beauty and added equipment.

The new model includes stream line design, Fisher aluminum body, high hood, drum type headlights, dash and dome lights, windshield wiper, sunvisor, plate glass windows operby Turnstedt regulators, cord tires.

The new Five Passenger Touring Car has vacuum feed with gasoline tank in rear, drum headlights with legal lenses, high hood, stream lines, Gypsy curtains, glass in rear curtains, all side curtains open with doors, spiral bevel rear axle gears, baked enamel finish on body and fenders.

## Prices Have An Upward **Trend**

The cost of the material that goes into the construction of an automobile has advanced 21 per cent since January 1st. With the demand for cars far in excess of the supply, there is no reason for keeping the price down. Manufacturers will be forced to raise the price as they have been building on a very small margin of profit. Keen competition during the recent depression forced the price of automobiles down beyond a point warranted by reduction in material and labor.

Regarding pre-war prices, you know that you are getting a better automobile today for less money than you would before the war, and the cost of material and labor that goes into the making is twice as great. Leave your order today and be protected in price.

The Utility Coupe is the greatest selling, fully equipped Coupe on the market, with Fisher aluminum body, plate glass windows operated by Turnstedt regulators, large rear compartment, gasoline tank in the rear with Stewart vacuum feed, sun visor, windshield wiper, legal head light lenses, cord tires.

Car is complete in every detail; beautiful body lines. baked enamel finish, gasoline tank in the rear, large storage compartment under rear deck, one man top, Gypsy back curtains, all curtains open with doors, plate glass window in the rear.

All Chevrolet cars are completely equipped with Electric Lights, Starter, Speedometer, Oil guage, and in fact, all of the standard equipment used on cars selling at more than \$2000

We cover nearby towns in Otsego and Delaware counties and will be pleased to have you call and see our display of all Models of

Chevrolet Cars. Drop us a card and we will have our salesman call on you. You can purchase a Chevrolet Car for cash or on time payments if you so desire. We have a fully equipped service station with com-

petent mechanics, also a large supply of Chevrolet parts. Come and see us or drop us a card today. Prices may advance at any time.
